In 1995, Marvel Comics unleashed a cataclysmic event that would forever alter the landscape of the X-Men: Age of the Apocalypse. This groundbreaking crossover shattered reality, plunging the world into a dystopian nightmare where Magneto ruled as a benevolent dictator and the X-Men fought for their survival against a relentless onslaught of horrors.

The Shattering of Reality

The catalyst for this cataclysmic event was Legion, the son of Professor X and Moira MacTaggert. In a desperate attempt to prevent his father's assassination, Legion traveled back in time and accidentally killed Charles Xavier, creating an alternate timeline where Magneto rose to power and the X-Men were scattered and hunted.

The Dystopian Nightmare

In this twisted reality, Magneto's rule was not driven by conquest or malice but by a desperate desire to protect mutantkind from annihilation. However, his methods were harsh and unforgiving, leading to a society where humans were oppressed and mutant dissidents were ruthlessly suppressed.
