4. Use MailChimp to create and send email newsletters

MailChimp is a popular email marketing service that makes it easy to create and send email newsletters. MailChimp offers a variety of features, including templates, automation, and analytics.

5. Use Google Analytics to track your results

Google Analytics is a free web analytics service that provides you with insights into your website traffic. You can use Google Analytics to track your website's performance, identify areas for improvement, and make data-driven decisions.

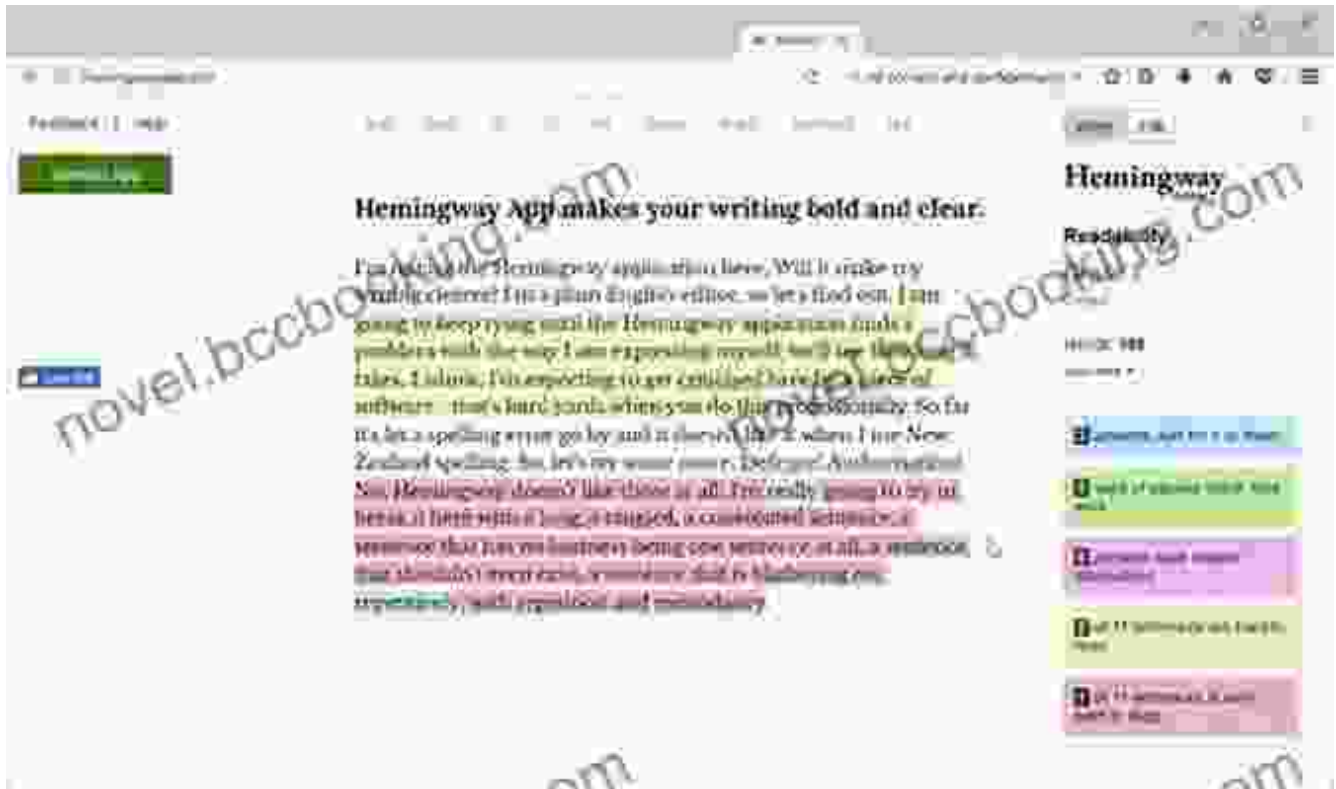

6. Use Zapier to automate your tasks

Zapier is a web-based service that allows you to automate your tasks between different apps. For example, you can use Zapier to automatically add new email subscribers to your MailChimp list, or to create new social media posts when you publish a new blog post.

7. Use Hemingway Editor to improve your writing

Hemingway Editor is a free online tool that helps you to improve your writing. Hemingway Editor highlights complex sentences, passive voice, and adverbs, and suggests ways to simplify your writing.

8. Use Grammarly to check your grammar and spelling

Grammarly is a free online grammar and spelling checker. Grammarly checks your writing for errors in grammar, spelling, and punctuation, and suggests corrections.

9. Use Copyscape to check for plagiarism

Copyscape is a free online plagiarism checker. Copyscape checks your writing for similarities to other content on the web, and reports any instances of plagiarism.

Defend Your Site with a Banner

Protect your site with a copyright warning banner to warn potential plagiarists against copying your content. Choose from the gallery below and click to add it to your site. Preview banners will auto convert if your browser is not supported.
