Older autistic adults are a growing population, but their voices are often marginalized. This book gives them a platform to share their stories, in their own words.

The contributors to this book come from all walks of life. They are parents, grandparents, siblings, friends, and advocates. They are artists, writers, musicians, and scholars. They are all autistic, and they all have something important to say.

In this book, you will learn about the challenges that older autistic adults face. You will hear about their struggles with social isolation, discrimination, and poverty. You will also hear about their resilience, their creativity, and their determination to live full and meaningful lives.

This book is a powerful reminder that autism is a spectrum disorder. There is no one-size-fits-all description of an autistic person. Older autistic adults are as diverse as any other population group.

This book is also a call to action. We need to do more to support older autistic adults. We need to create more inclusive communities, provide more accessible services, and challenge the stigma that surrounds autism.

This book is a must-read for anyone who wants to make a difference in the lives of older autistic adults.

Praise for Older Autistic Adults: In Their Own Words

"This book is a groundbreaking and inspiring contribution to the field of autism studies. It gives voice to the experiences of older autistic adults, a population that is often overlooked and misunderstood. The contributors to this book share their stories with honesty, vulnerability, and humor. Their words will challenge your assumptions about autism and inspire you to think differently about aging and disability."

—Dr. Temple Grandin, author of Thinking in Pictures and The Autistic Brain

"This book is a must-read for anyone who wants to understand the unique challenges and triumphs of older autistic adults. The contributors to this

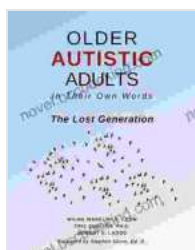

book offer a diverse range of perspectives, from personal memoirs to academic essays. Their words will educate, inspire, and challenge you to think differently about autism and aging."

—Dr. Steve Silberman, author of **NeuroTribes: The Legacy of Autism and the Future of Neurodiversity**
