By Rob Stewart

National Geographic Emerging Explorer Rob Stewart has traveled the world to document the impact of human actions on the planet's wildlife and ecosystems. In his new book, *Save the Humans*, Stewart shares his experiences and insights, and calls for urgent action to protect Earth's biodiversity.

Stewart argues that the decline of wildlife is not just an environmental issue, but a threat to human society itself. He points out that wildlife provides us with essential services, such as pollination, seed dispersal, and water filtration. It also plays a vital role in regulating the climate and controlling pests.

Unfortunately, human activities are putting wildlife at risk. Habitat loss, pollution, climate change, and overfishing are all major threats to biodiversity. Stewart warns that if we do not take action to protect wildlife, we will face serious consequences, including food shortages, water scarcity, and disease outbreaks.

Save the Humans is a call to action for everyone who cares about the future of our planet. Stewart provides a roadmap for change, outlining

specific steps that we can all take to help protect wildlife. He also offers a message of hope, reminding us that it is not too late to save the humans.

Rob Stewart is a world-renowned conservationist and filmmaker. He is the founder of the Sharkwater Foundation, a non-profit organization dedicated to protecting sharks and other marine life. Stewart has produced several award-winning documentaries, including Sharkwater (2006) and Revolution (2013).

Save the Humans is a must-read for anyone who cares about the future of our planet. Stewart's passion and dedication are evident on every page, and his message is clear: we must act now to protect Earth's wildlife.

Reviews

"Save the Humans is a powerful and urgent call to action. Rob Stewart's passion for wildlife conservation is infectious, and his message is clear: we must all do our part to protect Earth's biodiversity." - Jane Goodall, PhD, DBE, Founder, the Jane Goodall Institute

"Rob Stewart is one of the most important voices in the conservation movement today. Save the Humans is a must-read for anyone who cares about the future of our planet." - Sylvia Earle, PhD, National Geographic Explorer-in-Residence

"Save the Humans is a beautifully written and deeply moving book. Rob Stewart's passion for wildlife conservation shines through on every page. This book is a must-read for anyone who cares about the future of our planet." - David Suzuki, PhD, Geneticist and Environmental Activist
