Exposing the Myth of the Midas Touch

The Midas Touch is a myth. There is no such thing as a person who can turn everything they touch into gold. In fact, the pursuit of the Midas Touch can often lead to financial ruin.

The Midas Mistake Us Version Myth Menders exposes the myth of the Midas Touch and provides a new understanding of how to create wealth and success. The book is based on the research of Dr. Thomas J. Stanley, who spent 20 years studying the financial habits of millionaires.

Stanley's research found that most millionaires are not flashy spenders. They are not the type of people who drive expensive cars or live in mansions. Instead, they are frugal and disciplined with their money.

Stanley's research also found that most millionaires did not inherit their wealth. They built their wealth through hard work and smart investing.
